

Woolenwick Junior School - Existing Cycle Shelter Refurbishment

We were contacted by the school head teacher Mr Richard Plant to facilitate a refurbishment of the existing cycle storage shelter, images were provided showing the condition of the sheeting which required replacement, additionally storage capacity should increase with the introduction of scooter storage racks.

New UV2 clear sheeting was installed together with new powder coat colour finish cycle stands and scooter racks. The refurbishment included a re-paint of the shelter framework which was arranged separately by the school.
